

STRENGTH, AGILITY AND VERSATILITY

TRACK SYSTEMS YOU CAN COUNT ON

S-TECH 600GX
Wide Track Systems for Tractors

Soucy 

WIDE TRACK SYSTEMS FOR TRACTORS

Whether you're applying fertilizer in the spring or tilling in the fall, the S-TECH 600GX gives the strength needed to your tractor to be effective and to get more work done in a day. The large diameter of the sprockets provides greater transport speed, so you can spend more time in the fields and less on the road. You will also experience a better ride comfort and a more precise driving.

GET EVEN MORE FLOTATION

The S-TECH 600GX is available with two track options: 25 in (635 mm) or 30 in (762 mm). This means that you will work with complete confidence without the risk of getting stuck thanks to the large ground contact area of the tracks.

USE YOUR TRACTOR TO ITS FULL POTENTIAL

The chevron profile of the track combined with its long footprint allows you to enjoy optimal traction. Result: your load capacity is increased to do more work, faster and better!

DISCOVER A NEW LEVEL OF RIDE COMFORT

With its walking tandem, the S-TECH 600GX follows ground contours. For you, it means a more stable drive and a more comfortable ride in the cab.

REDUCE YOUR OPERATING COSTS

Thanks to the transparent wheel hub covers, the oil levels can be checked at a glance. Plus, no weekly maintenance is needed. The oil bath axles require maintenance after 500 hours of use, or annually.

INSTALL YOUR TRACK SYSTEM EASILY

The S-TECH 600GX can be installed on a wide range of tractor models in the 100 to 225 HP power bracket. In addition, no modification to the vehicle is necessary.

TECHNICAL SPECIFICATIONS
